

DAILY NEVADA STATE JOURNAL.

VOL. 6.

RENO, WASHOE COUNTY, NEVADA. SUNDAY MORNING. NOVEMBER 12, 1876.

NO. 36.

TRAVELER'S GUIDE.

Arrivals and departures of trains and stages at Reno:

GOING EAST.

Central Pacific Express train arrives at 2:30 A. M. and leaves 2:30 A. M.

Central Pacific emigrant train arrives at 4:30 A. M. and leaves at 4:40 A. M.

GOING WEST.

Central Pacific express train arrives at 11:30 P. M. and leaves at 12:05 A. M.

Central Pacific emigrant train arrives at 2:30 P. M. and leaves at 2:45 P. M.

GOING SOUTH.

Virginia and Truckee express train arrives at 10 P. M. Leaves at 6:30 A. M.

Virginia and Truckee freight train arrives at 11 A. M. and 2 P. M.; leaves at 1:30 A. M.; 1:45 P. M. and 5 P. M.

GOING NORTH.

Virginia and Truckee express train arrives at 10 P. M. Leaves at 6:30 A. M.

Virginia and Truckee freight train arrives at 11 A. M. and 2 P. M.; leaves at 1:30 A. M.; 1:45 P. M. and 5 P. M.

LOCAL PASSENGER.

Leaves Reno for San Francisco at 10:05 P. M. Arrive in Reno from San Francisco at 6 A. M.

GOING NORTH.

Hammond & Wilson's stages leaves for Susanville at 3 A. M.; returning at 4 P. M. Fare \$12.

Hammond & Wilson's stages leave for Peavine every morning at 8 o'clock, returning arriving at 4 P. M. Fare \$1.50.

RENO DIRECTORY.

BARLOW, H. W., Constable and Collector, Virginia street.

BARNETT & BRO., Clothing and Dry Goods, cor. Commercial Row and Virginia St.

BARKER, D. H., Civil Engineer and U. S. Deputy Surveyor, Peavine.

BECKER, J. J., Capital House, corner Commercial Row and Virginia street.

WELCH, M. E., Woodcreek Chop House, Virginia street.

GEORGE W. CUNNINGHAM.

KEPT CONSTANTLY ON HAND THE best assortment of

Family Groceries, Fruit, Vegetables, Sugar, Coffe, Tea, Spices, Bacon, Ham, Butter, Eggs, Fresh and Dried Fruit, Crackers of all kinds, Canned Fruit, Canned Vegetables, Canned Oysters and Sardines, Coal Oil, Cheeses, Nuts, Candy, Tobacco, Cigars, Baskets and Brooms, which we will sell at the lowest market price and sell for yourself.

GEO. W. CUNNINGHAM, Journal Building, Second St., Reno.

SPRING MILLINERY.

MISS GOLDEN, just down to Gray & Isaac's Virginia street, announces to her numerous lady friends that her new millinery store is now open. The stock now embraces the latest novelties in

IMPRESSED FRENCH HATS,

ALSO

P. L. WEBBS

Of the most beautiful and latest patterns, and a very choice assortment of the

FINEST MILLINERY GOODS EVER SEEN IN RENO.

SELL AND EXAMINE, **ON**

SPRING

The rumor representing that a Swedish navigator has just discovered a new northern passage to China is an important matter to the commercial and scientific world—"if true." We are told that Professor Vordenkield sailed from Hammerfest, Sweden, on the first of August, and following the line of the Gulf Stream as it penetrates the Arctic regions via Nova Zembla, the explorer reached the mouth of the Yenisei river, in Northern Siberia, and then ascended that river and penetrated the Asiatic continent almost to the frontiers of China.

This route has hitherto been dreamed of by geologists and navigators, but has been regarded as impassable, because of the frozen seas and inhospitable region through which it passes. Yet the Swedish navigator tells us that during the entire voyage he met with no serious obstacle to navigation, and that "the water was uniformly found to be surprisingly warm." This statement is contrary to the experiences of Sir Hugh Willoughby, Martin Frobisher, and other ancient explorers for a "North-East Passage to China, and in the pursuit of which Great Britain expended vast sums three centuries ago. Has the climate changed in the Arctic regions to the east of Nova Zembla?

The Yenisei river has its source in Mongolia, and runs south of the mountain range that separates China from Russian Siberia, thence flowing north through Lake Baikal, in Thibet, and so on to the Arctic Ocean. The advantages to Russian and Chinese commerce by this route (if practicable) will be immense, and if immediately developed might measurably satisfy Russia with an outlet for her trade and commerce to the far East, for which she is now threatening Turkey. The free passage of the Dardanelles, connecting Black Sea with the Mediterranean, would not be available to Russian commerce without control of the Suez Canal—which Great Britain will never permit. Hence, if the newly discovered source of Arctic navigation by the Yenisei river proves practicable, it will be of incalculable value to Russia, developing her vast territory in Siberia, and opening the long coveted commerce of the Orient.

OUR NEXT LEGISLATURE.

Nevada has done remarkably well. She not only gives Hayes and Wheeler a handsome majority, elects Leonard Judge, and Wren to Congress, but also gives us a Republican Legislature. The latest calculation places the Senate, Republicans 12; Democrats 12; and 1 Independent (Ross) who will probably act with the Republicans.

RESPECT FOR THE SABBATH.—The strict enforcement of Sabbath observance by the Centennial authorities has had a good effect in Europe. In the closing weeks of September a conference was held in Geneva, Switzerland, of persons desirous of introducing a better regard for the Sabbath. The Emperor of Germany sent a representative, as did also the civil authorities of Carlsruhe, Stuttgart and Alsace. Austria, Holland and Switzerland had voluntary representatives, and churchmen of different sects gathered in considerable numbers. Europe is far behind America in regard for the Sabbath, and the advantages to our civilization are so obvious to all who have visited us, that the civil governments on the Continent discover the necessity of imitating our system as a matter of policy!

BEN BUTLER'S ELECTION.—The Washington *Chronicle* puts the matter as follows:

Ben Hill will be back from Georgia, and we doubt whether any man can be found strong enough to keep him silent. Little Susset, we fear, will be as noisy and impudent as before, and neither the polished eloquence, the graceful rhetoric, nor the poetical patriotism of Garfield, nor the refined wit of Hurlburt, will avail much against them. To meet such men as these we want the trenchant blade of Ben Butler's tongue—no courtly, dainty rapier. Ben Butler, and he alone of all the loyal politicians, can cope with Ben Hill. Pit them against each other in the House and it will be such a duel as has never been fought on that historic floor.

THE REPUBLICAN LEADERS OF SAN FRANCISCO announce their intention of making a thorough and searching investigation of the alleged election frauds there, since the Democrats have started.

THE GREAT QUESTION

HAYES THE FAVORITE YET.

Secretary Morrill telegraphs this to the Rothschilds as a fact.

Chicago.—The vote was unexpectedly closed in this State at the late election between the Democrats and Republicans, and Cullom's majority for Governor will not be nearly as large as was expected. The Legislature is in doubt, with the chances that the Republicans will have a small majority on joint ballot. This will not, however, change the Congressional gains telegraphed last night.

Concord, N. H.—Two hundred and thirty-two towns in this State give Hayes, 41,546; Tilden, 38,456; Scott, 30. The remaining three towns last March gave Cheney (Democrat) 23; Marcy (Republican) 42.

Boston.—The entire vote of Massachusetts, with the exception of the Gosnold, is: Hayes, 149,205; Tilden, 108,247; Rice, 136,282; Adams, 105,825; Baker, 12,127. Rice's plurality, 30,433; majority, 19,326.

San Francisco.—Ex-Governor Faucheu this morning claims his election in the Fourth District by 622 majority thus far, and that the precincts to be heard from will not materially modify that result.

New York.—A *Graphic* Washington special says Secretary Morrill has sent an official cable dispatch to the Rothschilds, the financial agents of the Government, that Hayes has been elected President of the United States. The fact that the Secretary has sent his official pronouncement to such an announcement gives the faint hearted great hope. Secretary Morrill bases his opinion on private dispatches he has received from both Florida and Louisiana, from men whom he knows to be reliable.

Charleston.—To Hon. J. M. Edmunds.—We stand firm, the shotgun Democrats cannot move us.

D. H. CHAMBERLAIN.

New York 2 p. m.—The situation still remains unchanged, both parties equally anxious and confident regarding doubtful states.

Storey County.—The following candidates are elected by the majorities named: Kelly, Dem., Sheriff, by 688; Smith, Dem., County Treasurer, by 276; Fox, Rep., 115; McFarland, Dem., County Clerk, by 378; Nichol, Dem., County Recorder, by 220; Drake, Rep., District Attorney by 50; Hodges, Rep., Public Administrator by 365; Pasmore, Rep., Superintendent of Schools by 167; Haist, Rep., County Surveyor by 146; Hazeltine and Nye, Reps., and Johnson, Dem., for County Commissioners; Schultz and Stewart, Dem., State Senators by 1,026 and 123 respectively. As the returns are not all in it is impossible to give other majorities.

RESPECT FOR THE SABBATH.—The strict enforcement of Sabbath observance by the Centennial authorities has had a good effect in Europe. In the closing weeks of September a conference was held in Geneva, Switzerland, of persons desirous of introducing a better regard for the Sabbath.

The Emperor of Germany sent a representative, as did also the civil authorities of Carlsruhe, Stuttgart and Alsace. Austria, Holland and Switzerland had voluntary representatives, and churchmen of different sects gathered in considerable numbers.

Europe is far behind America in regard for the Sabbath, and the advantages to our civilization are so obvious to all who have visited us, that the civil governments on the Continent discover the necessity of imitating our system as a matter of policy!

The daily yield ore has been increased to 230 tons. This ore is being taken out from the 400 down to the 800 foot level, and is of excellent quality. The ore-stores in general are looking well. The veins down from the 800 to the 1000-foot level continue in remarkably good ore. The north and south drifts from crosscut No. 3 on the 800-foot level are in splendid ore. Crosscut No. 2 is looking more favorably. The ore body makes to the north and east and is being approached in this crosscut. Crosscut No. 1 is in fine vein-matter, carrying spots of ore. The southeast drift on the 1000-foot level is in good-looking vein-matter, carrying some low-grade ore, and is making excellent progress. The northeast crosscut from the north drift, on the same level, has its face in vein-porphyry, carrying stringers of low-grade ore. The water in this part of the mine has greatly decreased of late and is easily handled by the pumps running at the rate of five strokes per minute.

California.

There has been no particular change in the general appearance or workings of the mine since our last report. The various ore-breasts and stope continuations to look finely and are yielding as usual daily 500 tons, from the 1500 to the 1600 foot level. The main south drift on the 1600-foot level is being extended, the face still continuing in rich ore. The C. and C. shaft is making its usual progress on down. The flow of water has greatly decreased since last report. The work of cutting out the big working station on the 1600 foot levels of the Consolidated Virginia and California mines is making rapid progress, being over 200 feet. The new side-track from the main line of the Virginia and Truckee railroad to the C. and C. shaft has been completed. The new ore-house being erected under the tramway leading from the C. and C. shaft to the California battery mill is making rapid advancement toward completion.

Ophir.

The car-samples of ore have increased in richness during the past week. The different prospecting drifts in the mine are looking encouragingly well, especially the south drift on the 1600-foot level, from the bottom of the vein. The crosscut on the 1300-foot level, running out east to prospect for the rich ore found in the California on that level, is in favorable vein-matter, assaying tolerably well. The main incline to the 1700-foot level is nearly completed throughout the whole shaft. The work of putting in the new pump and columns will be commenced in about a week.

Yellow Jackets.

Nothing particularly new since last report. Sinking the south veins below the 1000-foot level is making good progress. The north drift on the 1600-foot level, running to connect with the south drift on the 2100-foot level of the Imperial mine, is making good progress. On the

NEVADA MINING NEWS.

(Virginia Mines of Yesterday.)

The stock market during the past week has been remarkably dull. This has doubtless been on account of the great and absorbing interest felt in the general election. Men may think of more than one thing at a time, but when their every attention is given to so important a subject as the election of the President and Vice President of the United States, even stocks must for a time be left to take care of themselves.

The consequence has been as was to have been expected. A neglected stock market produced a stagnation of business in that line. A stagnation of business, in the absence of any particularly new and important developments, must necessarily result in a depression of the stock market. This seems to take in the whole situation. The present stagnation and consequent depression has been felt at the mines and less work is being done along the line, particularly among what is known as the outside mines, than formerly. This will doubtless soon be remedied, now that the excitement of the election is about over.

But already is the interest in our great industry reviving. Men are beginning to watch the Stock Boards more narrowly, and crowds are seen at the brokers' windows which remind us of former and happier days. This will doubtless increase, but the affairs of the nation must become settled before anything like a stock mania can take place.

The mines are looking generally well. The prospects in Mexican and Ophir are improving. The same is true of other mines. Justice is especially opening up very richly, and yielding an increased amount of good ore.

CONSOLIDATED VIRGINIA.

There is nothing new to be noted as to the workings or general appearance of the mine. The best report was made last Thursday in the final clean up of the past fiscal month. This report gave as a total shipment of bullion for that period \$1,335,989.00, thus paying the regular monthly dividend of \$1,080.00, leaving a balance of \$255,989.00 to pay running expenses with. The stope on the 1400, 1500 and 1600-foot levels are yielding 400 tons of good ore. The various ore-producing sections of the mine were never looking better. The workings of the mine are in the very best possible condition. The large pocket of water which broke into the mine recently from under the sill floor of the 1300-foot level and ran down to the 1500 and 1550-foot levels and gave some trouble for a time, is entirely under control and the mine dry as ever. The new mill is kept running to its full capacity.

Justice.

The daily yield ore has been increased to 230 tons. This ore is being taken out from the 400 down to the 800 foot level, and is of excellent quality. The ore-stores in general are looking well. The veins down from the 800 to the 1000-foot level continue in remarkably good ore. The north and south drifts from crosscut No. 3 on the 800-foot level are in splendid ore. Crosscut No. 2 is looking more favorably. The ore body makes to the north and east and is being approached in this crosscut. Crosscut No. 1 is in fine vein-matter, carrying spots of ore. The southeast drift on the 1000-foot level is in good-looking vein-matter, carrying some low-grade ore, and is making excellent progress. The northeast crosscut from the north drift, on the same level, has its face in vein-porphyry, carrying stringers of low-grade ore. The water in this part of the mine has greatly decreased of late and is easily handled by the pumps running at the rate of five strokes per minute.

California.

There has been no particular change in the general appearance or workings of the mine since our last report. The various ore-breasts and stope continuations to look finely and are yielding as usual daily 500 tons, from the 1500 to the 1600 foot level. The main south drift on the 1600-foot level is being extended, the face still continuing in rich ore. The C. and C. shaft is making its usual progress on down. The flow of water has greatly decreased since last report. The work of cutting out the big working station on the 1600 foot levels of the Consolidated Virginia and California mines is making rapid progress, being over 200 feet. The new side-track from the main line of the Virginia and Truckee railroad to the C. and C. shaft has been completed. The new ore-house being erected under the tramway leading from the C. and C. shaft to the California battery mill is making rapid advancement toward completion.

Ophir.

The car-samples of ore have increased in richness during the past week. The different prospecting drifts in the mine are looking encouragingly well, especially the south drift on the 1600-foot level, from the bottom of the vein. The crosscut on the 1300-foot level, running out east to prospect for the rich ore found in the California on that level, is in favorable vein-matter, assaying tolerably well. The main incline to the 1700-foot level is nearly completed throughout the whole shaft. The work of putting in the new pump and columns will be commenced in about a week.

Yellow Jackets.

Nothing particularly new since last report. Sinking the south veins below the 1000-foot level is making good progress. The north drift on the 1600-foot level, running to connect with the south drift on the 2100-foot level of the Imperial mine, is making good progress. On the

2040-foot level the crosscut started to the eastward at a point 100 feet south of east crosscut No. 1 has been run 110 feet and is in a formation of vein porphyry and quartz. The surface work at the new shaft is being pushed rapidly on. The shaft itself had yesterday morning reached the depth of 50 feet.

JULIA CONSOLIDATED.

The drift on the 1600-foot level south, toward the Ward, is making its usual excellent progress, averaging 24 feet per week, and is cutting a formation of quartz, which gives additional promises as it is continued on. This drift is now looking considerably better than at last report. The drift south on the 1800-foot level is still improving in general appearance. It is still following the east wall of the vein.

MEXICAN.

The west crosscut on the 1800-foot level has struck the ledge cut in the Union Consolidated further north, and is looking very favorably. Work on the 1400-foot level has been pushed ahead in the west crosscut and the upraise and winze therefrom are both showing more favorably.

GERMAN.

The west crosscut on the 1800-foot level has struck the ledge cut in the Union Consolidated further north, and is looking very favorably. Work on the 1400-foot level has been pushed ahead in the west crosscut and the upraise and winze therefrom are both showing more favorably.

Savage.

The new air compressor has been put in place and started up, and is giving a good supply of power to the donkey pumps below. This will greatly facilitate the draining of the mine. The pumps are running at about eight strokes.

ENTER CONSOLIDATED.

The west crosscut from the north drift on the 1300-foot level is showing fine vein matter. It has penetrated the vein about 60 feet and continues to improve as it progresses.

THE REPUBLICANS.

The Republicans will probably have control of the next House of Representatives.

THE ALTAR.

BOSCH—FRITSCH—In Reno, Nov. 10, 1876, at the residence of Geo. Gutschbach, Mr. Frederick Bosch of Reno, to Miss Mary Fritsch of Philadelphia, by J. S. Gilson.

NOTICE.

THE undersigned will receive proposals in writing and under sealed envelopes to sink by contract the EMMA SHAFT, from present bottom down FIFTY FEET. The Company reserving to themselves the right to reject any or all proposals and will turn over to material of any kind excepting the lumber to timber the shaft in proper workmanlike manner. Proposals must be properly signed and will be received until Wednesday, six o'clock in the evening, November 15th, 1876. Address to G. C. LUCIS DEGENHARDT, P. O. Box 68, Reno, Nov. 10, 1876.
